

Ideas to develop your creativity:

- Build your own micro-habitat. (5 points)
- Design the ideal habitat for a mini-beast of your choice. (3 points)
- Create a 'save our mini-beasts' poster. (2 points)

Ideas to extend your research skills:

Develop your research skills by finding out information about a mini-beast e.g. a ladybird or a grasshopper and present your findings through a:-

- Poster
- Fact File
- PowerPoint
- Poem (4 points)

prospectus

This half term's POWER Project is:

Mini-beasts and habitats

NAME _____

Choose your projects to achieve 6 POWER points or more!

You can add with your own ideas too for extra points!

Ideas to explore your mathematical skills:

- Create a bar graph to show the different species of mini-beasts found within your garden/park. (3 points)
- Create a Venn diagram to sort mini-beasts in to different categories e.g. wings/no wings or more than four legs/less than four legs. (4 points)

Ideas to explore your locality:

- Find out as many facts as you can about the different mini-beasts living in our local parks e.g. Sutton Park and Kingsbury Water Park. (3 points)
- Compare the habitats of different mini-beasts from around the world. Present your findings through a leaflet, a poster, a table or a booklet. (4 points)
