

### Additional Maths Activity 1 - 2 POW Points

A local company are looking for a new design to launch their Anglo-Saxon themed party wear. The company are very specific in their requirements and would like an authentic piece of jewellery to be the centre piece of their new range. Inspired by the patterns and trends of the ancient tradition, the company would also like the piece of jewellery to have a minimum of two lines of symmetry.

### Additional Maths Activity 2 - 3 POW Points

Locate the different Anglo Saxon settlements in which modern UK towns and cities derive their names from (Birmingham, Southampton, Stanstead, Luton, Norwich, Reading, Peterborough, Scarborough). Draw a one, two or four quadrant grid over your map and provide grid co-ordinates for the position of each settlement.
